ANTH 376 / SSP 461-012. Culture and the Individual Spring, 2013 Dr. John B. Gatewood 10C Price Hall #40 758-3814 / JBG1

### OUTLINE

This course is about the relation between culture and the individual. The question to bear in mind is: How does the cultural milieu into which an individual is born influence that person's personality development and cognitive processes? During the semester, we shall survey the literature in two sub-fields of anthropology — the culture and personality school and cognitive anthropology — to see how anthropologists have tried to answer these questions.

The course is divided into three main parts. First, we briefly discuss what is meant in speaking of "culture" and of "personality." This brief introductory section is intended to deepen your grasp of basic concepts. Second, we review the work of the culture and personality school in anthropology. Studies of this genre were done mostly between the 1930's and the early 1960's, although there is a contemporary revival. Third, we move to the cross-cultural study of cognition, or thought processes, which is an active research area involving anthropologists, psychologists, and linguists. After an historical overview of the major currents in cognitive anthropology, we will learn some of the specialized data collection techniques now in vogue in the field. Following the methodological digression, we shall focus more deeply on a few specific topics: the Sapir-Whorf hypothesis, cultural models inherent in folk classification systems, personal versus collective representations, and intracultural variability. The last week or so of the semester (while you are busy writing your major papers), I will describe my own recent research concerning aspects of consensus analysis.

Please note that our use of class time changes during the semester. During the first few weeks, I will lecture in order to introduce topics not in the readings and to speed coverage of the culture and personality material. During the second and third sections of the course, however, most class periods are for students to discuss the readings. Whether a given period is lecture or discussion, you are responsible for carefully reading the assignments, sifting out their important points, and evaluating their arguments **BEFORE** coming to class. Of course, I shall be helping you, but I want you to learn to read literature written for a professional audience by yourself.

### MATERIALS

There are two "course packets" and two paperback books required for this course. The two books are available from the University Bookstore (or online), whereas the two course packets will be distributed in class (with reimbursement for xeroxing costs to be collected). Listed in the order we will use them, the materials are as follows:

COURSE PACKET #1. Barnouw, Victor (1985) Culture and Personality, 4th Edition. Belmont, Ca.: Wadsworth Publishing. [chapters 1 through 10, plus references and glossary]

D'Andrade, Roy G. (1995) The Development of Cognitive Anthropology. New York: Cambridge University Press.

Weller, Susan C., and A. Kimball Romney (1988) Systematic Data Collection. Beverly Hills, Ca.: Sage Publications.

COURSE PACKET #2. About 17 articles, book chapters, and papers by various authors.

### REQUIREMENTS

Your grade in the course will be determined by a variety of assignments. Briefly, the course requirements are as follows:

In-class exam covering Course Packet #1 readings	200 points
In-class exam covering Course Packet #2 readings	200 points
CourseSite postings on D'Andrade (chapters 2 – 9)	50 points
Take-home essays based on D'Andrade's book	100 points
Short essay (about 5 pages) early in the semester	40 points
Three article critiques (about 2 pages each)	60 points
Research paper, with re-write (about 15 pages)	200 points
Class participation	50 points
	Total = 900 points

Note that <u>attendance is required</u>, and especially so during the data-collection exercises. Also, you should read all assignments in advance of the period for which they are assigned. In this way, our discussion of them is more profitable.
